Summary

MCA graduate with experience in data analysis, reporting, and insights through internship and academic projects. Proficient in SQL, Python, Excel, Tableau, and Power BI. Experienced in data cleaning, analysis, and visualization with a strong focus on accuracy and problem solving.

Experience

Software Developer Intern | Varad Consultants & Analyst Pvt. Ltd. | Sangli, India

JUN 2025 – AUG 2025

- Developed and enhanced a multi-vendor application supporting sales reporting, inventory management, invoicing, and customer records.
- Validated and maintained business data across vendor-specific databases to ensure data accuracy and consistency.
- Investigated and resolved client-reported application and data issues through testing, debugging, and root-cause analysis.
- Collaborated with mentor to implement enhancements, support deployment activities, and provide progress updates.

Projects

Retail Sales Analysis | Python, Google Sheets, Tableau

JAN 2026

- Cleaned and validated retail transaction data by handling missing values, removing duplicates, and correcting inconsistent records.
- Analyzed sales performance, return rates, product trends, and country-wise revenue distribution to identify business insights.
- Used Google Sheets QUERY functions for data organization, reporting, and trend analysis.
- Developed dashboards in Tableau and Google Sheets to monitor key performance indicators and support decision making.

Campaign Performance Analysis | Excel, Python

MAR 2025

- Analyzed one year of Facebook and Google Ads campaign data to evaluate engagement, conversions, and campaign effectiveness.
- Cleaned, validated, and organized campaign data in Excel before analysis using Python.
- Calculated conversion rate and cost per conversion, identifying higher conversion efficiency for Facebook (~27%) than Google Ads (~10%).
- Developed visualizations and analyzed performance trends to support marketing recommendations.

Technical Skills

Languages: SQL, Python

Data Analysis & Visualization: Microsoft Excel, Power BI, Tableau, Google Sheets

Libraries: Pandas, NumPy

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Jupyter Notebook
